## CELLPAVE™ HD

The ultimate truck-grade, heavy duty cellular paving system from  
Origin Suregreen Limited.

Designed from the ground up, CellPave™ HD is incredibly strong and sets a new standard in permeable paving systems.

Proudly made in the UK, CellPave™ HD is made from 100% recycled UK sourced post-industrial polymers.

Each paver is 600mm x 400mm x 75mm thickness (4.17 pavers per sq metre). Weighing 8kg each (33kg/m<sup>2</sup>) they fall well within the HSE manual handling limits and are quick and easy to install. The unique design also allows Interlocking stacking on pallets, resulting in reduced shipping costs.

### CellPave™ HD pavers have been designed to be installed with both gravel and grassed infills

They are particularly suitable for incorporation into a SuDS compliant system and may even negate the need for water attenuation when installed on a suitable porous substrate. Cell Pave™ HD is the perfect system for use on large scale civil engineering compound areas or contractor's storage areas as they can easily be uplifted at the end of the contract and re-used if required.

#### CellPave™ HD can be installed for use with all forms of traffic including:

- HGV and coach parking areas
- Emergency vehicle and fire access routes
- Highway verge reinforcement (particularly where HGV overrun can occur)
- Fork lift loading areas

## A key feature of Cell Pave™ HD is the unique channel cut-outs

### TOP PROFILE

1

Enables 75% more product to be stacked on a single pallet when compared to TruckPave 80

4

Aids inter-cell drainage and allows nutrients to pass between cells

### BOTTOM PROFILE

2

Offset interlocked stacking ensures a very stable pallet for transportation

5

Promotes a much healthier root system that allows lateral root growth

### SIDE PROFILE

3

Prevents stagnation inside the cell when a non-porous substrate is used for installation

6

A double stacked, cross bonded layout is also possible

### Materials

100% recycled from UK sourced post-industrial polymers. We have a guaranteed, consistent material source. Durability in all climates is well proven as the same materials have been used to manufacture speed ramps for over 20 years.

### Supply

Multiple press tools and continuous 24/7 production enables high volume manufacture to ensure your installation is completed on schedule.

### Certification & Testing

Extensive testing has shown our paver to be virtually indestructible. We are backing up this testing with certification from both Lloyds and TUV.

### Design

Our unique design incorporates substantial improvements over existing products in the marketplace.
