

## COMPOST GUIDE

### How to Use Levington® Peat-Free Organic Blend Farmyard Manure

Levington® Peat-Free Organic Blend Farmyard Manure can be used straight from the bag – it's as easy as that. When filling or potting, firm lightly. Keep the compost moist and do not let it dry out. Do not leave the plants standing in water.

#### **Before sowing and planting:**

Fork Levington Organic Blend Farmyard Manure to the soil surface and to the bottom of the planting holes, drills and trenches for an abundant crop of flowers, fruit and vegetables.

#### **Vegetable plots and allotments:**

In spring, spread a 5-8cm (2-3 inch) layer of Levington Organic Blend Farmyard Manure over soil and dig in before sowing or planting. On heavy clay soils, repeat when winter digging.

#### **Established beds and borders:**

Spread a 5-8cm (2-3 inch) layer of Levington Organic Blend Farmyard Manure beneath the branches of roses, shrubs, trees and bushes. Allow a 5-8cm gap around stems. This 100% organic mulch will help the soil retain moisture, suppress weeds and release food to surrounding plants.

#### **Plant invigoration:**

In spring, apply a layer of Levington Organic Blend Farmyard Manure (approx. 5-8cm/2-3") deep onto the clean soil around established herbaceous flowers, shrubs, fruit and vegetables and work into the soil surface. It will add nutrients for better yields and vital plant development.

#### **New lawns:**

Spread a 5-8cm (2-3 inch) layer of Levington Organic Blend Farmyard Manure deep onto clean soil and dig into the top 10-15cm of soil for improved grass seed germination and quicker establishment of turf.
