Technical Data Sheet

HOLDFAST TREE TIE RUBBER BLOCK

Tree & Hedge Planting

Holdfast Tree Tie Rubber Blocks provide cushioning protection between tree trunks and stakes when used with Holdfast Rubber Tree Belting. Designed to prevent rubbing damage and ensure long-term tree stability in planting schemes of all sizes.

Each block features a central groove engineered to snugly hold the tree belting in place, allowing for quick and reliable installation. The flexible yet robust rubber construction ensures long-lasting performance in outdoor conditions without cracking or deforming. Available in three sizes to match the 25mm, 40mm, and 50mm Holdfast Tree Tie Belting widths, these blocks are essential for professional landscapers, forestry contractors, estate managers, nurseries, and garden designers working on projects ranging from small garden planting to large-scale forestry schemes.

Information

Material: Flexible, UV-resistant, weatherproof rubber

Colour: Black

Applications: Slot belting into block's groove and place between tree and stake

Functions: Prevents rubbing, cushions tree trunk, stabilises support system

Weather Resistance: Suitable for year-round outdoor use
