Technical Data Sheet

NATURAL TREE TIE

Rural Tree Planting

A natural tree tie offering great tree strapping method to offer support and secure newly planted or already established to tree stakes or cross bars.

The natural tree tie is made entirely of natural fibres and is fully biodegradable, making it a simple, low cost and effective tree tie. With the natural tree tie, spacers are not required as you can form a spacer by using the tree tie itself. It reduces tree strangulation and biodegradable as the tree establishes.

Features

Material	Jute (Hessian)
Roll Width	50mm
Thickness	1mm
Roll Length	36 yards

Benefits

- Supports and secures newly planted and already established trees
- Fully biodegradable and will not strangle the tree
- Low cost
- Made entirely of natural fibres
- Simple and effective
- Does not require a spacer, spacer can be formed using the Natural Tree Tie itself

Guidance

Wrap it around itself to make a cushion to protect the tree from rubbing.
