Technical Data Sheet

SHRUBSHELTER

Rural Tree Planting

A large diameter, 50% recycled content shelter designed for use on shrubs, trees and bushier plants.

This shelter protects plants from animals and herbicides while providing a microclimate for better establishment and survival rate while retaining moisture to reduce water stress and enhance drought survival.

Shrubshelter is an extruded polypropylene tube which protects and helps establish shrub plants.

Benefits

- Features strengthening rods to prevent shelter tearing at stake area
- Twin-walled construction for best strength to weight ratio
- UV stabilised to provide a minimum of 5 year protection
- Flared rim to minimise stem abrasion
- Pre-fitted releaseable ties for quick installation and maintenance

Specification

Material	Polypropylene tube
Height	0.6m, 0.75m
Diameter	130mm – 160mm
Number of Ties	2
Type of Ties	Releasable
Nest	4
Bundle	28
Colour	Green
Service Life	5 Years (minimum)
