

TECHNICAL DATA SHEET

BOP/Pheasant Netting

Characteristics	Data
Product Type	Pheasant Netting
Mesh Size	20mm x 20mm
Weight	70g/m ²
Material	Polypropylene
Heights	1m, 1.2m, 1.5m, 2m
Roll Length	100m
Colour	Black
UV-Stabilised	Yes

INSTALLATION NOTES

When installing fencing applications using this mesh, we highly recommend using straining wires to give extra strength to the plastic netting. Straining line wires are available on this website and are used to keep the fencing taut and strong. Straining lines wires are fixed to the netting at the top using hog ring clips and pliers. The 2m mesh may need a 2nd or 3rd line wire as desired.

The netting can be fixed to wooden fencing posts or timber stakes using u-nails or nylon cable ties, but for a long-term fencing solution, we recommend battening the netting as this spreads the strain on individual netting filaments. Battening involves simply fixing the plastic netting between the posts/stakes and another length of treated timber along its length.
